

“My classmates were on the cutting edge of social, economic, cultural or academic issues facing the Upper Valley. Having that level of collective thought available for a whole year was outstanding. The guest speakers and resource materials were of the highest caliber and led to some very serious and thought provoking conversations. *Leadership Upper Valley* has given me a lasting legacy.”

“I have lived in the Upper Valley for over thirty years and it was not until I was part of *Leadership Upper Valley* that I had the chance to learn about all the different elements of our community that interact to make it go. As a result of my participation, I have made many new friends and have had the opportunity to meet and learn from key community leaders. I have also become more keenly aware of all of the organizations and people that are dedicated to making the Upper Valley such a great place to live and work.”
